

Probetection™

optimal protection, perfect fit

palmedic

Probetection™ for safe ultrasound imaging procedures.

Palmedic offers a complete line of products to protect patients, medical staff and equipment against cross contamination during ultrasound scanning procedures. Probetection™ ultrasound probe covers will provide a perfect fit for all kind of ultrasound transducers in various disciplines. Are you using Philips, Siemens, General Electric, Toshiba, Aloka, BK, Medison or any other brand? There is always a perfect fitting Probetection™

probe cover available for a variety of disciplines using ultrasound scanning procedures. The Probetection™ product line is offering two different cover materials: A medical graded latex and a medical graded non-latex material, each having its own unique features. All Probetection™ probe covers and bite guards are individually packed, available both sterile and non-sterile.

Probetection™

Probetection™ covers are available for the following disciplines:

Gynaecology

Transvaginal transducers are widely used in gynaecology ultrasound scanning procedures. Do you prefer a snug fit, or would you like to have the entire probe covered including the handle? Probetection™ offers perfect fitting covers for all trans-vaginal probes.

General purpose covers

Urology

Probetection™ is available in different types and shapes for trans-rectal ultrasound scanning procedures: as a general purpose sanitary probe cover and as a water stand-off cover in order to create near field visualisation.

TOE/TEE kit

Radiology

X-ray departments are carrying out many types of ultrasound scanning procedures. In this particular discipline, a wide range of ultrasound probes are used, including linear, sector and convex probes. In this field, Probetection™ is offering a range of sterile covers and cable cord covers.

Non latex TOE/TEE cover

Cardiology

The Trans-Oesophageal Echocardiography (TOE/TEE) Ultrasound probe is used in cardiology. Probetection™ TOE/TEE covers are available as a single cover, a single cover wrapped on an applicator or as a complete Ready To Use Kit.

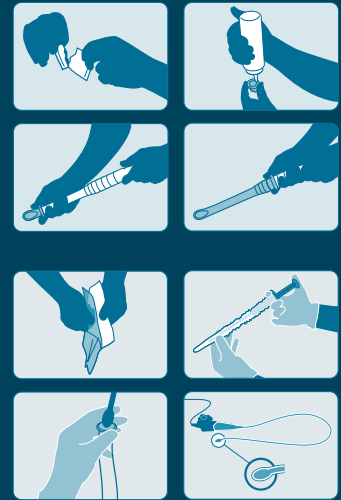

Bite guard

Probetection™ Features:

- Complete product range for each particular discipline
- Unique probe cover design
- Fast and simple application
- Time saving for medical staff
- Efficient and economic
- Reduces investments in equipment
- Saves and reduces cost on maintenance and repair of probes
- Maximum protection for staff and patients against cross contamination

Intra-operative

The right cover for most types of probes used in organs imaging during surgical interventions. Probetection™ ultrasound probe covers used during intra-operative scanning procedures are available in non-latex only.
